

Co-funded by the  
Creative Europe Programme  
of the European Union

#### SYNOPSIS

airify :: AIR platform (B-AIR EU Creative Europe 2021-23) Audiodata frontend.

Swallow whole musical directories, flush metadata to airfront database and create yaml metadata files for further usage.

Gregor Pirs <gregor.pirs@guest.arnes.si>

#### OPTIONS

```
-f <directory> || -pwd
  swallow current a directory or current directory, convert flush to
  server

-nosync
  do not transfer to server, just keep the files in the temp dir [
  ~/temp/airfront/ ]

-l <PARAM> - list db entries
  WHERE <PARAM> =
    -- AIRC catalogue number to match (exact) if preceeded with :nn (:2,:3)
    OR

    -- recording date to match (exact) if preceeded with @ (@2.5.2023) OR

    -- any other (string) field (title|author/s|performer/s s) to match
    (ilike) if starting with any other character than : or @

-R | -revert <PARAM> - revert the DB so that it will continue filling-in at
the <PARAM> AIRC
```
